FLA_015706_OR

Choose an appropriate place for the door, less than 130 mm from the ground. Using the stencil provided, trace the shape on the door in the desired location.

When you have drawn the outline of the cat flap, cut out the outline in the door.

You can modify the loose tunnel to the thickness of the door. The maximum thickness is 80 mm. Two cutting lines have already been marked: 16 and 38 mm.

Now place the three parts of the cat door in the correct position and attach them with the screws provided.
